Jefferson Mendonça

Software Engineer | Full Stack Developer

Natal, Brazil | jelffdev@gmail.com | linkedin.com/in/jelff | github.com/Jelff

PROFESSIONAL SUMMARY

Software Engineer with experience in frontend and backend development, web applications, and Artificial Intelligence-based solutions, using React, TypeScript, NestJS, Flutter, and Docker. Experience in CI/CD, development standards, and delivery automation. Proactive professional with the ability to communicate technical concepts to non-technical audiences, identify needs, prioritize demands, organize and delegate tasks, lead alignment discussions, and contribute to the quality of software processes and products.

PROFESSIONAL EXPERIENCE

Software Engineer 2024 – Present

Senac RN – Technological Innovation Environment

- Developed institutional software solutions used by more than 5,000 users, including **Sofia IA Hub**, an Artificial Intelligence assistant platform connected to institutional knowledge sources using RAG.
- Implemented frontend and backend features using **React, TypeScript, Tailwind CSS, NestJS, and PostgreSQL**, making architectural decisions and defining a layered architecture.
- Structured CI/CD processes and DevOps practices within the technological innovation environment, replacing decentralized procedures with documented and standardized workflows.
- Defined development standards including **Git Flow, Conventional Commits, ESLint, Prettier, Pull Requests, Code Review, and technical documentation**, strengthening process consistency.
- Automated build, lint, validation, and deployment processes using **GitHub Actions and Docker**, creating automated workflows before production releases.
- Developed and executed automated **End-to-End (E2E)** tests using **Playwright**, validating functional workflows and contributing to application reliability.
- Implemented real-time AI response streaming and integrations between frontend, backend, and processing services.

Mobile Development Intern 2024

Inter Sistemas

- Developed and maintained two mobile applications in the transportation and healthcare sectors, used by more than 1,000 users, using **Flutter and Dart**.
- Prototyped and implemented interfaces and features, fixed existing issues, and established a Design System, improving visual consistency and user experience.
- Integrated mobile applications with backend services through REST APIs.

Frontend Development Intern 2021 – 2023

DTI – SEAP/RN

- Developed institutional web systems used by approximately 1,500 public servants using **Angular, TypeScript, HTML, and CSS**.
- Created reusable frontend components and structured interfaces using component-based development.
- Implemented interface improvements and API integrations, contributing to system maintenance and evolution.

Junior Frontend Developer 2021

Wunderman Thompson Technology Brasil

- Developed frontend solutions using **HTML, CSS, and JavaScript** for digital campaigns created for Pfizer.
- Implemented responsive interfaces focusing on cross-browser compatibility.

FEATURED PROJECTS

Sofia IA Hub – Institutional Artificial Intelligence Platform

React, TypeScript, NestJS, RAG, Docker, PostgreSQL

Developed the Sofia IA Hub platform, connecting institutional knowledge sources to conversational assistants, working on frontend development, backend integrations, AI workflows, and CI/CD processes. The project won 1st place at the state level and 4th place nationally in the 2026 IEL Talent Award.

DireitoAI – AI-Powered Legal Assistant

React, Node.js, RAG, Docker, CI/CD

Developed a Full Stack AI application for labor law consultations, featuring Gov.br authentication, JWT, document analysis, and automated pipelines.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, Dart, SQL

Frontend: React, Angular, Tailwind CSS, HTML5, CSS3, Material UI, Bootstrap, Framer Motion

Backend: Node.js, NestJS, Spring Boot, REST APIs, JWT, WebSockets

DevOps & Tools: Docker, Docker Compose, GitHub Actions, CI/CD, Git, Linux, npm, Gradle, Maven

Databases: PostgreSQL, SQL Server

IoT & Embedded Systems: ESP32, C++, Sensor Integration, Data Acquisition, Sensor Monitoring, PlatformIO

Engineering Practices: Clean Code, SOLID, Design Patterns, Layered Architecture, Git Flow, Conventional Commits, Code Review, End-to-End Testing (E2E), Agile

EDUCATION

Federal Institute of Rio Grande do Norte (IFRN)

Associate Degree in Systems Analysis and Development (TADS) | Expected Graduation: 2026

LANGUAGES

Portuguese (Native) | English - Reading, Writing, and Text Comprehension (Advanced) - Verbal Communication (Intermediate)
